Today's topic: how to create a project proposal

What's in a question?

Questions can involve:

- a topic of interest,
- a specific phenomenon,
- a method you want to apply, and/or
- a specific dataset.

What is a project proposal?

A document about a potential project that:

- defines the **project description, methods, and expected output,**
- lists the resources needed, and
- should contain an **abstract.**

Project Description

Should include:

- an introduction,
- a question,
- a general overview, and
- if you have any references from similar projects, list them.

Methods

Should include:

- how you will answer your question,
- any theory behind the methods, and
- list the tools and/or software needed.

Expected output

Discuss any results you expect to see, or what potential results of an exploratory analysis would look like.

**Let's create a proposal
together (-:**
